

MegaSkills® in Special Education

Dear Dr. Rich:

"I founded a learning lab in San Angelo, Texas in 1991 to help prevent local students from falling through the cracks in the academic world. I accepted any child who wanted to explore the possibilities of accelerated learning.

"I have worked hard to find ways which allow students of various abilities and levels to succeed. I have been blessed to have knowledge and opportunities fall into place unexpectedly. Your book, MegaSkills, was constant reference for me. My students (most of whom were learning challenged) not only succeeded, they soared! Students topped out standardized tests."

Sincerely,

Jeanine McGregor
